

SHOBHITHA SPANDANA S

+91 7338490270 | spandana2882@gmail.com | [Linkedin](#) | [GitHub](#) | [Portfolio](#) | Bangalore, Karnataka

PROFESSIONAL OBJECTIVE

AI/ML Engineering graduate with a strong foundation in Python, software development, data processing, machine learning, and REST API development. Hands-on experience building AI-powered applications and deploying ML solutions using FastAPI and Docker. Familiar with OOP, DSA, SQL, Git, SDLC, deb

EDUCATION

Don Bosco Institute of Technology

Bachelor of Engineering in Artificial Intelligence & Machine Learning
CGPA: 8.5

Dec 2022 - June 2026
Bengaluru

Courses: Data Structures & Algorithms, Machine Learning, Big Data, Data Base Management System

GV PU College

Pre-University College

Jul 2020 - Apr 2022
Davangere

82 Percentage

Courses: Physics, Chemistry, Mathematics, Biology

SKILLS

Programming Languages: Python, JavaScript, Java, Object – Oriented Programming (OOP)

Data & AI / ML: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Machine Learning

Backend & APIs: FastAPI, Postman, Flask, REST APIs, JSON

Databases: SQL, Database Management System (DBMS)

Development & Tools: Git / GitHub, Docker, Streamlit, Spring Boot

Core Computer Science: Data Structures & Algorithms, SDLC, Debugging & Troubleshooting

Cloud: Cloud Computing, AI & Cloud Technologies

EXPERIENCE

SuprMentr Technologies Pvt Ltd | AI & Cloud Computing Intern

Bangalore, KAR

Feb 2026 - May 2026

- Developed an AI Code Assistant using Python and cloud-integrated technologies during a 15-week internship.
- Built AI-based web development workflows involving API integration and real-time code generation.
- Applied software development and cloud computing concepts to build and deploy scalable AI-driven solutions.
- Collaborated on capstone development, debugging, problem solving, and software engineering activities.

PROJECTS

Luna AI –AI-Powered Video Understanding System | Don Bosco Institute of Technology

Jan 2025 -Nov 2025

- Engineered an AI-powered Python web application for end-to-end video analysis and multimodal understanding.
- Integrated Whisper, YOLO, Tesseract OCR, and ChatGPT to process and analyze 100+ videos.
- Developed backend processing workflows using Python and Flask for YouTube links and uploaded videos.
- Integrated audio, visual, and text-based intelligence to support real-time interactive video analysis.

Manufacturing Output Prediction (Linear Regression) | TNSIF

Oct 2025

- Built a machine learning model to predict manufacturing output using 400 records and 13 machine parameters.
- Performed data analysis, preprocessing, feature engineering, and model evaluation across multiple ML algorithms.
- Achieved 91% prediction accuracy using Random Forest after comparing multiple models.
- Developed a FastAPI REST service and Dockerized the application for portable real-time prediction.

Heart Disease Detection (Classification) | TNSIF

Sep 2025

- Developed ML models to predict heart disease using a clinical dataset with 400 patient records.
- Conducted EDA, data preprocessing, and feature selection to prepare model inputs.
- Compared multiple algorithms and achieved 93% accuracy using Random Forest.
- Developed a FastAPI REST service and Dockerized the prediction system for scalable access.
